However their use in computer vision based systems that often provide solutions to automated video ... Sat, 09 Feb 2019 01:37:00 GMT Multi-agent based framework for person re-identification ... - The framework is based on the Multi-Agent System (MAS). The control frame-work aims to encourage the resource sharing among different autonomous microgrids and solve the energy imbalance problems by forming the microgrid coalition self-adaptively. Firstly, the conceptual model of the integrated microgrids and the layered cooperative control framework is presented. Then, an advanced dynamic ...
